CSIC
CONSEJO SUPERIOR DE INVESTIGACIONES CIENTÍFICAS

POSTDOCTORAL POSITION

The Laboratory of Prof. José Pérez-Martín, at the Instituto de Biología Funcional y Genómica (IBFG) in Salamanca offers a **3-year postdoctoral position**. Starting date January 2012.

We are interested in the connections between pluripotency, germ cells and tumorigenesis in the model system *Caenorhabditis elegans*.

The IBFG is a CSIC-Universidad de Salamanca Research Institute focused on the study of the regulatory mechanisms of cellular functions and its integration in the context of the genome through advanced methodological approaches of cell biology, molecular genetics and genomics. The recipient Laboratory is fully equipped with the state-of-art to manipulate *C. elegans*.

Applicants with Ph.D. in Genetics, Biochemistry or Molecular Biology, and a strong background in molecular biology, and worm genetics are encouraged to apply. Please send CV, brief description of previous research and names of two references to: jperez@cnb.csic.es
