

Postdoctoral Position

We are searching for candidates to apply for a **Postdoctoral Position** from CSIC (JAE-Doc) (<http://www.csic.es.vicyt/jaedoc2009.html>) to work on our Research Project “Cellular Response to DNA Damage during the Mitotic and Meiotic Cell Cycle”, financed by the Ministry of Science and Innovation of Spain (BFU2009-07159).

Our group is interested in the study of the molecular mechanisms involved in the maintenance of genomic stability, with special emphasis in the role of certain chromatin modifications. In addition, we are also studying the surveillance mechanisms (checkpoints) of the meiotic cell cycle that ensure proper chromosome segregation and avoid the formation of aneuploid gametes.

Interested candidates please contact before November 25th with:

Dr. Pedro A. San-Segundo
Instituto de Microbiología Bioquímica CSIC/USAL
Campus Unamuno. 37007 Salamanca
